[Portfolio](#)

Results-driven professional with hands-on experience in developing innovative **Full Stack** and **mobile** solutions using **Python**, **Java** and **Flutter**. Seeking to leverage my expertise to drive impactful results and contribute to the success of a forward-thinking organization. Committed to delivering excellence and pushing the boundaries of user experience.

## Areas Of Expertise

---

- Flutter
- Android Development using Java
- Cross-Platform Development
- API Integration
- Python
- Node
- Database Management (MySQL, SQLite, PostgreSQL)
- Professional Communication
- PHP
- HTML, CSS, JS
- Multilingual (English, Hindi, Gujarati)

## Education

---

### SSC

St. Joseph E.T. High School

### HSC

Jay Ambe International School

**Bachelors:** 2020-2023

Government Science College, Chikhli

Veer Narmad South Guj. University

BSc Computer Science **7.64 CGPA**

**Masters:** 2024-\*

Parul University, Vadodara

Masters In Computer Applications

(Online)

## Experience

---

### • IT Express

**English Express,**

Opp Collector Office, Jalaram Mandir Road

Valsad 396001

**Mr. Pritam Pavaskar**

### Full Stack Developer

Aug-2023 to *Present*

**PHP and Web Development:** Expertise in project management, database design, and frontend/backend development.

**Team Leadership:** Successfully managed projects with a focus on teamwork and collaboration.

**AJAX and API Integrations:** Developed and managed integrations to support mobile connectivity.

**Innovation and Problem-Solving:** Proactively addressed challenges to streamline processes and improve outcomes.

**High-Quality Solutions:** Delivered effective and innovative project outcomes.

**Understanding Client Needs:** Effectively identified and addressed client requirements to ensure successful project outcomes.

### Projects:

**English Express:** Developed a comprehensive staff and student portal with robust functionality for staff management, student management, and institute administration.

**Van Express:** Enhanced van system functionality and innovated route management, providing drivers with clear instructions on pickup and drop-off points to streamline student transportation.

**Parivartan:** Created a platform for community issues with integrated web and mobile components, focusing on local area development to enhance community support and connectivity.

## Additional Skills

---

- Team Work and Collaboration
- Versatility
- Attention to details
- Adaptability
- Technical Skills
- Problem Solving
- Time Scheduling
- Project Management
- Critical Thinking

## Personal Projects

---

- **The Lost Item Finder**

Language: HTML, CSS, PHP

Database: MySQL

This web-based platform is expertly designed to facilitate the recovery of lost items by connecting those who find items with their rightful owners. Users who find an item can upload its details to the system, including descriptions and photos, making it easier to catalogue and search. Similarly, individuals who have lost an item can provide detailed descriptions and images of their missing belongings.

The platform employs a sophisticated matching algorithm to compare the details of found and lost items. When a match is found, the system promptly notifies the owner of the lost item, allowing them to reclaim their property. The matched item is then transported to a designated collection station where the owner can collect it.

Additionally, the platform keeps both the finder and the owner updated throughout the process. Once the item is successfully transferred to the station and collected by the owner, the finder receives a confirmation notification. This ensures a seamless and transparent recovery process, enhancing the chances of successfully reuniting lost items with their owners.

- **The Outback Stainers FC App**

Language: Java

XML: For layout design and UI elements

Database: SQLite for efficient data storage and management

The Outback Stainers FC App is the official application for the Outback Stainers Football Club, developed to enhance the fan experience. Utilizing Java and XML for development, with SQLite for efficient data management, the app delivers essential features to keep supporters engaged and informed. It offers real-time updates on news, match information, and player statistics.

Fans can access schedules, scorelines, and detailed player profiles, ensuring they stay connected with every aspect of the team's performance. Additionally, the app features a shopping area where users can explore and purchase official team merchandise, further enriching their connection to the club.

Designed with a focus on user experience, The Outback Stainers FC App provides a seamless and interactive platform for fans, making it an indispensable tool for following and supporting the team.
