PROFESSIONAL SUMMARY

Data Analyst skilled in Power BI, SQL, DAX, Power Query, and data modeling with prior experience in backend and full stack development. Experienced in building interactive dashboards, transforming raw datasets into actionable insights, and developing business intelligence solutions using PostgreSQL and MySQL. Strong understanding of database systems, KPI reporting, and analytics-driven decision-making.

SKILLS

SQL: MySql, PostgreSQL
Power BI: DAX, Power Query, Power BI Services
Python: Pandas, Numpy, Matplotlib, Seaborn
Other Skills: Data Cleaning,Data Modelling, Interaction Design, User Experience (UX) & Interface (UI) Design
Interpersonal Skills: Analytical Thinking, Data Storytelling, Attention to details, Team Collaboration, Continuous Learner

EXPERIENCE

Enjay IT Solutions Ltd Data Analyst Intern	Jan 2026 - Apr 2026 Bhilad, Gujarat
- Performed data cleaning and transformation using Power Query, preparing analysis-ready datasets from multiple disparate sources. - Designed optimized data models using star schema and proper table relationships, improving report performance and accuracy. - Developed advanced DAX measures and calculated columns to surface KPIs, trends, and performance indicators for business stakeholders. - Built interactive Power BI dashboards featuring slicers, drill-throughs, and dynamic visuals, enabling data-driven decision-making.	
English Express Full-stack Developer (PHP, Flutter)	Aug 2023 - Apr 2025 Valsad, Gujarat
- Worked extensively with MySQL and PostgreSQL databases for application development and backend operations. - Wrote complex SQL queries for data retrieval, reporting, and business workflow management. - Developed backend APIs and handled structured data processing for web and mobile applications. - Collaborated on Flutter-based applications and optimized database performance for scalable systems. - Gained hands-on experience in data handling, relational databases, and system logic relevant to analytics workflows.	

EDUCATION

Masters of Computer Applications (MCA) Parul Distance Learning University CGPA: 8.82	Jul 2024- Apr 2026 Vadodara, Gujarat
Bachelors of Science in Computer Science (BSc CS) Government Science College(VNSGU) CGPA: 7.64	Jul 2020 - May 2023 Chikhli(Navsari), Gujarat

PROJECTS

Lead Source Analysis Dashboard	Github
- Developed an end-to-end Power BI dashboard analyzing 51,417 leads across multiple properties for a Popular Hotel Chain, tracking conversion rates, lead aging, and sales performance from Jan 2019 to Mar 2026. - Built dynamic DAX measures for key KPIs including 49.79% overall conversion rate, average days to close per source, and dead lead ratio by channel. - Implemented a star schema model with segmentation by lead source (Corporate, FIT, Travel Agent, MICE, Social Event), sales team, region, and property — enabling drill-through analysis across 20+ lead categories. - Connected to Power BI Service for automated refresh with self-serve slicers across CRM agent, region, hotel, and date range. - Surfaced actionable insight: Corporate leads drove the highest volume (18,673) at 68.72% conversion, while Email Marketing showed near-zero conversion (0.04%) — directly informing strategic reallocation of sales resources.	
Sales, Employee Performance & Operations Dashboards	Github
- Developed a suite of 4 interconnected Power BI dashboards for Enjay IT Solutions — covering sales performance & projection, employee activity, partner sales, and development team operations — delivering end-to-end business visibility across the organization. - Built a Sales Performance & Projection dashboard tracking ₹111.38 Cr in past sales across 49,916 opportunities, with ₹404.62 Cr in future revenue projections using DAX-driven forecasting models segmented by product, user, and opportunity type. - Designed an Employee Activity dashboard monitoring 24,969 tasks, 30,000 calls, and 35,509 activity hours, featuring 4 drill-through tabs and KPI cards reflecting a 90.38% productivity rate. - Created Partner Sales and Development Team dashboards tracking work distribution across 5 sub-teams, bug resolution time, ticket handling, and project task allocation. - Applied advanced DAX measures, dynamic slicers, and star schema modeling to enable drill-down reporting for management decision-making.
